Functions

Smart H.264+

Delivering high quality video without straining the network, Smart H.264+ is the optimized implementation of H.264. The Smart H.264+ encoding platform includes a scene adaptive encoding strategy, dynamic GOP, dynamic ROI, flexible multi-frame reference structure and intelligent noise reduction, providing a savings of up to 70% of bandwidth and storage when compared with standard H.264.

ANR (Automatic Network Replenishment Technology)

Network Video Recorders with the ANR function automatically store video data on an IP camera SD card when the network is disconnected. After recovery of the network, the NVR automatically retrieves the video data stored on the camera.

Easy4ip

A smart home security system connects to your home Wi-Fi network so you can monitor and control your security using your smartphone and Easy4ip cloud and app. It allows you to do things like view live and recorded video for your daily life. The store recorded video locally on an SD card or cloud storage. Cloud storage makes it easy to store and access recorded video.
